Quiz Quest

Welcome to **Quiz Quest** — a fun and interactive quiz app designed to test your knowledge on various topics! This app challenges users with 10 multiple-choice questions, providing an engaging way to learn and improve in various subjects such as HTML, CSS, JavaScript, and web development.

Features

- **Interactive Quiz**: Test your knowledge with questions about web development technologies, including HTML, CSS, and JavaScript.

- **User-Friendly Design**: A clean and simple interface with an engaging layout, optimized for both desktop and mobile use.

- **Score Tracking**: After completing the quiz, users can view their score and compare their performance.

- **Responsive Layout**: The app is fully responsive and adjusts seamlessly to different screen sizes and devices.

How It Works

1. **Start the Quiz**: Begin by clicking the **Continue >** button on the welcome page.

2. **Answer Questions**: Each question is multiple-choice. Select one answer per question and click **Submit**.

3. **Get Feedback**: After each question, you will receive immediate feedback on whether your answer is correct or wrong.

4. **View Your Score**: Once you complete all the questions, your score will be displayed on the result page.

5. **Restart the Quiz**: If you'd like to retake the quiz, click the **Restart Quiz** button on the results page.

Technologies Used

- **HTML**: Structure and content of the quiz.

- **CSS**: Styling and layout to create a clean and user-friendly design.

- **JavaScript**: Logic for handling the quiz questions, answers, and score calculation.

How to Run Locally

1. Clone the repository to your local machine:

   git clone https://github.com/your-username/quiz-quest.git

2. Navigate to the project directory:

   cd quiz-quest

3. Open index.html file:

   - Double-click on index.html to open it in your default browser, or

     Right-click and select "Open with" and choose a browser (Chrome,

     Firefox, etc.).

The app will load in your browser, and you can start the quiz right away!
